Mr. Gordon MacLeod, Program Manager
Marshall Islands Program
Bechtel Nevada
P.O. Box 98521
Las Vegas, NV 89193-8521

ADDITIONAL AMENDMENTS TO BN'S FY 98 LOGISTICAL SUPPORT EFFORT (LSE)

Dear Mr. MacLeod:

This is to amend your LSE to the DOE's Marshall Islands program by including the following activities:

1. Manage and conduct the Marshall Islands medical program's field operations through a transitional, bridging period of six-months, beginning on or after July 1, 1998, and ending no later than December 31, 1998. This will include but not be limited to the provision of medical services, patient referral and support, conduct of the Fall 1998 Medical Mission to the Marshall Islands, and medical/administrative activities facilitating transition of the medical program to DOE's follow-on awardee for the medical program, Pacific Health Research Institute (PHRI) of Honolulu, Hawaii.

We have noted the success that BN has enjoyed in medically administering and logistically supporting the past two medical missions in the field, and are confident that you can build on this base of staff knowledge and experience, to fulfill this requirement.

In order to ensure that there are sufficient funds to meet the requirement in full, please provide us with a cost estimate for the activity at your earliest convenience.

2. Obtain the services of a skilled, competent translator to translate scientific reports from English into Marshallese; such reports to be produced in the next several months by LLNL for DOE. The purpose of the reports is to communicate the results of our environmental and radiological work to the affected Marshallese communities, and therefore, the reports must be translated in a manner that will communicate complex concepts into understandable, everyday Marshallese. Please contact LLNL to determine the volume of the reports that must be translated, and provide DOE with a cost estimate for the task. The task likely will begin in late July or early August.
