Dr. Eduardo Ramos
Jefe de la Division de Medicina
y Proteccion
Ministerio de Industria
Junta de Energia Nuclear
Avenida Complutense
Madrid 3, Spain

Dear Eduardo:

Enclosed are two of the items that you asked Dr. Richmond to send you. These happened to be two that he was not able to obtain readily. The volume on the "As Low As Practicable" concept is the summary; the backup data, which weigh a few pounds, will be sent by surface mail.

I have enclosed a Xerox copy of the article which I referred to in my previous letter concerning the tennis court at Palomares. There is no indication that I can see as to its date of publication, but the Xerox copy may help you identify it. I will make a translation, but I would appreciate your translation of any of the more difficult passages -- I do get confused on the double negatives. Please note how Palomares has changed! If this John Blashill ever visited Palomares, he was in the wrong country. In any case, I shall await your comments before responding other than to note receipt of the clipping from my correspondent Mrs. Houston.

We still await the decision by Congress as to the future of the present organization of the Commission. I will try to keep you informed.

Did you meet Dr. Larson when he visited Madrid this week? He is a very genial person and I know of his interest in Palomares.

With very best wishes to all.

Sincerely,

H. D. Bruner, M.D.
Special Assistant to the
Chairman
