Dr. Chet Richmond, ORNL

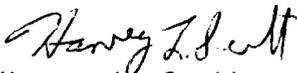

Request for Information for Bob Alvarez Briefing

Dear Chet,

Please provide a draft response for this request for information from Bob Alvarez. Also, please include references to studies, reports, etc. to support the response. I need your comments by December 9th to support my schedule for preparing the briefing.

Palomares, Spain - Bob Alvarez stated that he has reviewed related documents and was familiar with the post clean-up, the rotatilling of areas and had met with "villagers". He said that one woman stated that she had a child who died of leukemia after soldiers gave the child candy to pick-up bomb parts after the accident. Bob wants to know what we are up to and any findings we have.

Thank you for your assistance in responding to Mr. Alvarez's questions.
