

MEMORANDUM OF CONFERENCE OR CONVERSATION

DATE 2/27/92	TIME pm	<input checked="" type="checkbox"/> TELEPHONE <input type="checkbox"/> PERSONAL
ORIGINATING PARTY C R Richmond		OTHER PARTIES Emilio Iranzo, CIEMAT, Madrid

SUBJECT:
Visit to CIEMAT and other items

DISCUSSION:
Iranzo recommends that mid October might be the best time to visit Madrid and Palomares.

His daughter, Emma, will visit Chernobyl and Moscow later this year. Spain, like other European countries, is looking to assist.

I asked about the meteorological station in Palomares that we were going to upgrade several years ago. They could not afford to lose data so they proceeded with the upgrade on their own. I have modified the request for equipment in our FWP to address only counting upgrades (alpha stations, low energy photons for Am, and software interfaces). It was too late to change the 50K estimate. However, with the Am counting upgrade and the software addition the 50K may not be too excessive. It was too late to change. Just wanted to give you a heads up on this equipment item.

CONCLUSION OR AGREEMENT
